

VL10 **PN16**

Pneumatic & Electric Globe Control Valve European std.

The **VL10** is a single seated, two-port control valve, with in-line straight PN16 Flanged connections.

The **VL10** valves have been designed to provide accurate control in any process condition.

It is particularly suitable for a wide range of control applications, where fluids such as water, superheated water, steam, air, gas require accurate control.

AL SERIES PNEUMATIC ACTUATORS - SPECIFICATIONS

AP series pneumatic actuators are multi diaphragm actuators. They are Available with four (4) different sizes of internal diaphragms. They are extremely compact and they can guarantee a perfect linearity to satisfy the control needs of the valves at different working pressures. They are equipped with an pillar yoke (CEI EN 60534-6-1). A full range E/P positioners, solenoid valves, limit switch boxes and feedback devices are available as option. As you standard a mechanical travel indicator and index scale are included as standard on all actuators.
